Karen,

The staff have been working in the channel for several days. They attempted to make contact with the resident before they started but they would not open the door.

Sarah

Hi Sarah,

Mark Wich, a resident at 7866 Hazeltine Ave, Panorama City, CA 91402, has a storm drainage in his backyard that has collected debris and water. He is growing concerned that the drainage has the potential to serve as a breeding ground for various insects.

The backed up water is also starting to smell and as time goes by he fears that it will become a public safety hazard.

I have attached pictures to this email for your reference.

Would it be possible to address his concerns by having a team from Sanitation sent out to clean the drainage?

Thank you for your help,
